

DuPont Personal Protection  
5401 Jefferson Davis Highway  
Richmond, VA 23234

May 9, 2013

Dear Valued Customer:

This letter is to inform our customers that there will be a change in reported permeation data for chemical warfare agents on select Tychem® fabrics.

**Description of Change**

DuPont performs routine chemical permeation testing on Tychem® fabrics against the 21 Industrial Chemicals specified in ASTM F1001 plus 6 Chemical Warfare Agents. DuPont is reducing the requested test duration time used by the 3<sup>rd</sup> party lab on the chemical warfare agents from 720 minutes to 480 minutes.

**Change Schedule**

The updated testing using the maximum exposure time of 480 minutes for chemical warfare agents will begin in May 2013. For the most current permeation data, please go to [www.safespec.dupont.com](http://www.safespec.dupont.com).

**Fabrics That Will Be Impacted By the Test Exposure Time Change**

Tychem® F  
Tychem® ThermoPro  
Tychem® BR/LV  
Tychem® Responder® CSM  
Tychem® TK  
Tychem® Reflector

Please contact Customer Service at 800-931-3456 if you have questions regarding this change.

Thank you for your business.

Regards,
