DuPont Protection Technologies

January 12, 2015

To whom it may concern:

This letter is to remind our customers that DuPont Protection Technologies changed the exhaust valves used on Tychem® Level A suits.

Description of change

Effective September 1, 2013 DuPont transitioned to **Pirelli** valves for all Tychem® Level A suits.

Products impacted by the valve change

Prior to September 1, 2013, the following suits were made with **Auer** valves. For customer convenience DuPont will maintain replacement **Auer** valves until September 2019.

BR557T	TK557T	TK554T	TK555T	TK552T
TK612T	TK613T	TK600T	TK601T	

Diaphragm Exhaust Valve Replacement

Suits manufactured with **Pirelli** valves after July 2007 do not need the diaphragm replaced if after routine inspection the diaphragm shows no evidence of deterioration or cracks. DuPont recommends routine inspection of the diaphragm in the exhaust valves with a magnifying glass during each annual garment inspection.

Please contact your DuPont sales representative if you have questions regarding this change.

Thank you for your business.

Regards,

A handwritten signature in purple ink that reads "Nick DelliCompagni".
